

THE LAST TWO WEEKS

Marketing and ads, in one quick read.

CONTENT — WHAT WE POSTED

We stayed in the lanes that work: **education, the Superclass, and the everyday class**, a mix of reels and carousels:

- › Reel — "Old habits don't leave on their own. They get replaced."
- › Reel — "The Superclass from the inside."
- › Reel — "An hour on the mat helps you switch off."
- › Carousel — "Your glutes are a longevity organ."
- › Carousel — "Spike your blood sugar without eating a thing."

Same thread every time: real authority, tied back to the club. The educational pieces stay the steadiest performers, and carousels pull their weight next to the reels.

ADS — THE FIRST PAID RUN

We put the **first AFROFIT ads** live in this window. The lead creative, the "Different people. Different reasons. One decision." reel, did the heavy lifting:

8,470

PEOPLE REACHED

385

CLICKS TO THE CLUB

3.34%

CLICK-THROUGH RATE

That **3.34% click-through** is well above Meta's roughly **1% average**, at about **KES 3.6 per click** on roughly **KES 1,400 of spend**.

THE PER-CLUB WHATSAPP ADS

Alongside the main ad, we set up **per-club lead reels** that send an interested person straight into a WhatsApp chat with their own club, Yoga Reset and Afrobeats at Delta and TRM. They've only just started delivering, so the numbers are small, but early click-through is strong (4–11%).

One honest note: **connecting the WhatsApp number** so a click lands in the right club's chat was a bit of a challenge and took some sorting out. That's now **done**, so these per-club ads can run properly from here.

THE TAKEAWAY

Paid is now a **live channel**, and the first creative is already beating the benchmark on clicks. Next: let the WhatsApp reels gather a proper week of data now that the number is connected, then put budget behind the winners.
